

Introducing

Zebrazero

The texture of these laminates is a beautiful replication of nature, matching precisely with the woodgrain design for the most realistic feel yet produced in HPL.

These laminates have significant advance technological qualities that offer them an unmatched resistance to atmospheric factors and gives them soft and warm touch.

Edgeband

Edgeband

Type text here

These thin, light-weight PVC edging is used to finish and protect the edges to enhance the overall look and toughness of laminated surfaces.

It is made of PVC (polyvinyl chloride), a high-quality, impact-resistant thermoplastic polymer that is mechanically and thermally strong.

PVC edging is an ideal choice due to its durability and versatility as a thermoplastic material.

- Width :** 22 mm.
- Length:** 150 Meter / Roll
- Thickness:** 1 mm.

UNICORE Laminate

Regular Hi-Gloss Laminate

The identical color of the decorative surface and the core layers is what differentiates UNICORE! Display your desks, doors, counter-tops, table-tops, drawer, display shelves, shutters, and other furniture with a magnificent and immaculate UNICORE surface that has a consistent appearance throughout.

Surface layers are made out of decorative papers that have been impregnated with Melamine resins. The same decorative sheets are used as core layers, which are injected with Amino resins that have been specially processed.

Special Features :

- Abrasion resistance
- Mar Resistance
- Heat Resistance
- Stain Resistance
- High Aesthetics
- Colour Fast

Digital Gallery

Allow your creativity to go wild with our laminates. Allow us to personalize your surroundings with our laminates featuring digital impressions. Alternatively, you can create your personalized laminate and send it to us; it might be an image or any other design. On our laminates, we will assist you in bringing your ideas to life.

The imagination knows no boundaries. The true art, though, is being able to translate your imagination into something you can see, touch, and feel which you can choose from our Gallery.

"Imagination creates reality."

Postform Laminates

“Bend beyond Imagination”

The Post Forming Laminate collection was created specifically for use on vertical and horizontal interior surfaces where the laminate must roll in a simple radius over the substrate's edges. Post forming Laminate enhances the decorative property of edges of any conventional laminate by providing no seams around corners and a smooth, evenly laminated surface. It has added flexibility, malleability, and outstanding thermoforming qualities for forward and reverse bending applications.

All designs available in Post Form grade

FINENESS
LAMINATE REFINED

COMPACT LAMINATES

Awarded European CE Certification for its both Internal and External application Compact laminates range by ITC Inc., Czech Republic and has fulfilled all requirements as applicable as per EN 438-7:2005.

THICKNESS

3 - 25 mm

FEATURES

Weatherproof

Mechanically
Sturdy

Attractive

Excellent fire
Retardant

Wide range of
colours & designs

Light - fast

Termite
resistant

Environment
friendly

Easy to clean

APPLICATION

- Worktop
- Island Couter-top
- Furniture
- Bay Window
- Backsplash
- Partition
- Locker

FACADE EXTERIOR CLADDING

FACADE Exterior Cladding High Pressure Laminate (HPL) panels have a decorative surface that is suitable for exterior applications. Special quality resins provide extremely effective weather protection to external facades. These HPL are produced in lamination processes under high pressure and temperature. They are resistant to colour fading and are weather-proof with special protection against inclement weather according to standard EN432:2005 Part 6.v

BOARD SIZES

THICKNESS

3 - 25 mm

APPLICATIONS

- Wall and facade linings
- Cladding of exhibition buildings
- Sporting and entertainment complex
- Decoration of commercial sites
- Residential dwellings
- Silhouette profiles
- Fences
- Facade Claddings
- Business entry protals
- Functional constructions
- Balcony Claddings
- Partitions
- Rear ventilated facades
- Ceilings
- Outdoor furnitures
- Public facilities
- Playground facilities
- Sport facilities
- Sun protections
- Attic Claddings

All designs available in compact laminate in Normal and Exterior grade

FACADE FIRE RETARDENT

FACADE FIRE RETARDENT Exterior panels have extreme fire retardant quality which make them difficult ignite and have a low spread of flame. The evacuating time in case of fire is therefore prolonged. Produced in lamination processes under great pressure and high temperature, the panels have excellent weather protection achieve with protective coating consists of double hardened acrylic polyurethane resins.

FACADE FIRE RETARDENT Exterior panels come with these variants:

- 1) Front-side decor only
- 2) Both side decor
- 3) Black core
- 4) Brown core

Care & Maintenance

Your decision to select our Laminate will bring you years of quality performance. Everyday cleaning of our products is as simple as a quick wipe with a damp sponge. All resist muddy fingerprints, coffee spills and so much more.

Please read and follow the recommended care and cleaning procedures:

ROUTINE CARE

- To clean the surface, use a damp cloth or sponge and a mild soap or detergent. Rinse thoroughly with warm water and wipe dry.
- Difficult stains such as coffee or tea can be removed using a mild household cleaner and a soft bristled brush, repeating as necessary.
- If a stain persists, use a paste of baking soda and water and apply with a soft bristled brush. Light scrubbing for 10 to 20 strokes should remove most stains. Although baking soda is a low abrasive, excessive scrubbing or exerting too much force could damage the decorative surface, especially if it has a gloss finish.
- Stubborn stains that resist any of the above cleaning methods may require the use of undiluted household bleach or nail polish remover. Apply the bleach or nail polish remover to the stain and let stand no longer than two minutes. Rinse thoroughly with warm water and wipe dry. This step may be repeated if the stain appears to be going away and the color of the laminate has not been affected.
WARNING: Prolonged exposure of the laminate surface to bleach will cause discoloration.
- Hot pans and heat-producing appliances (such as electric skillets), when set directly upon counter-tops, can damage the product's beauty. Always use a heat shield, hot pad or trivet.

CAUTION PLEASE!

- Addictive or abrasive cleaners can damage laminate surfaces; do not use them.
- Drain cleaners containing lye will permanently damage any FINENESS Laminate surface. If you spill a drain cleaner, wipe it up immediately and rinse several times with water.
- Hair, Textile and food dyes can cause permanent stains. If dye should happen to spill, wipe it up immediately with dish washing detergent or an all-purpose cleaner.
- Never place pots or dishes directly from the oven or burner on an unprotected laminate surface; such extreme heat can cause cracking or blistering.
- Do not work with oven cleaners on an unprotected counter-top. Wipe spills away promptly and rinse several times with water.
- Rust removers contain harsh chemicals which will quickly cause permanent damage. If a spill occurs, wipe off all residue immediately, wash thoroughly with soapy water and rinse several times.
- Steel wool and other abrasive pads will damage FINENESS Laminate. Don't use them for cleaning and don't store steel wool pads on your counter-top; the metal can rust and leave stains.
- Toilet cleaners contain harsh chemicals that can cause permanent damage. If spills occur, wipe up immediately, wash surface with soapy water and rinse several times.
